

# Simplifying the data management by deploying Power BI dashboards powered by Azure

## The Customer:

A Philadelphia-based law firm practicing throughout the United States in the areas of litigation, business and finance, intellectual property, public finance, and real estate.

## The Challenge:

The client's Finance department wanted to modernize its **Business Intelligence (BI) platform** through efficient data ingestion and deliver visually rich and intuitive **dashboards**. Their infrastructure was becoming outdated and was no longer capable of managing the increased information demands the team was seeing or integrating effectively with their business intelligence reporting processes.

They wanted to centralize their data sources and get the ball rolling toward accurate, actionable reporting on those assets. They wanted to move their existing data warehouse to a more modern solution.

## Key requirements included:

- Leverage and exploit the latest features of Microsoft's **SQL on Azure Platform**
- Reduce IT management and administration overheads and increase overall agility in response to user requirements.
- Become "Future Ready"

## The Solution:

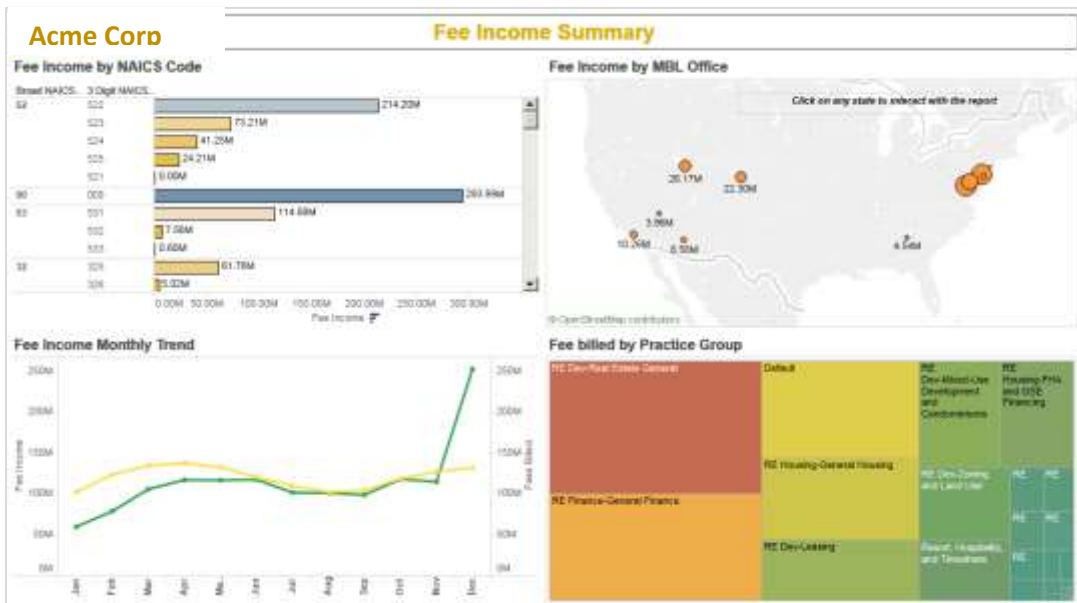

WinWire is helping the client to set up a **reporting data store on Microsoft's Azure platform, which enabled Power BI dashboards** for end-users in the finance department.

WinWire's solution included **SQL Server 2016 on Azure** as a 'Platform as a Service' (PaaS) and deploying Power BI dashboards.

With this level of data performance at their disposal, the Finance team will easily be able to meet the stringent demands and deliver efficiently to will drive the business forward. WinWire and the client have successfully rolled out the full-scale and robust data warehouse solution.

## Benefits:

- Reduced IT management and administration overheads
- Better Visibility
- Increased overall **agility**
