

## A large US law firm simplified operations, improved efficiency with Mobile App developed on **Xamarin**

### Customer Profile:

The customer is one of the largest US Law Firms and lobbying group with offices in Southeastern United States and Washington D.C. For more than 120 years, they have built a reputation for achieving results for their clients on a wide range of legal matters.

### Business Situation:

The attorneys frequently visited their clients for meetings and there was no formal way of documenting the visit details.

The customer was looking for a single interface to help attorneys in planning for the meeting, during-meeting and post-meeting activities.

### Key requirements included:

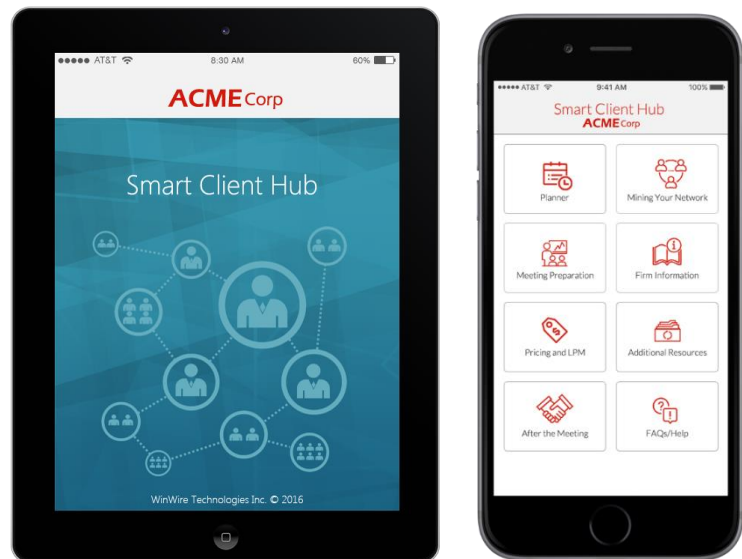

- The primary objective was to develop a mobile app for Attorneys for their iPhones and iPads that helps them in preparation for a meeting, provides required help during meetings and to plan follow-up activities.
- Create a user interface that is easy to understand and operate and conform to the client's branding guidelines.
- The app should make use of the backend SharePoint site.

### WinWire Solution:

WinWire Mobility Architects, Project Managers and project team worked closely with customer IT & Business to implement the platform for their attorneys, which provides easy access of the content to help them during preparation for meeting, during meetings and planning follow-up activities.

- Access the app on their iOS mobile devices
- View help content for preparation of meetings
- View help content during meetings
- Make note of the follow-up activities
- Submit client visit details
- Submit expense for reimbursements
- View submitted client visits and expenses
- Designed and developed the application with intuitive UI/UX on **Xamarin.Forms** platform using **SharePoint** as backend

**Technologies Used:** Xamarin.Forms. SharePoint

### Benefits:

- Accelerated Business Process
- Improved efficiency in planning and conducting client meetings
- Easy tracking of post-meeting activities
- Enhanced user experience
