Customer Story

Contract Review Agentic AI System

A leading global software ISV faced a challenge with **manual and time-consuming contract reviews** that slowed business timelines and created the risk of missed clauses and non-compliance.

WinWire deployed a **Contract Review Agentic AI System** that automated the first-pass contract review, **cutting review time by 50–70%.** The system intelligently detected, redlined, and flagged highrisk clauses while aligning with the client's **legal playbooks.**
