Customer Story

Agentic Al Powered Temperature Excursions

A leading life sciences enterprise faced a critical challenge in managing temperature excursions (TEs) across its pharmaceutical supply chain.

WinWire deployed a **Temperature Excursion Management Agentic Al system** that autonomously monitored TE alerts, synchronized excursion data, assigned cases, and triggered realtime notifications for rapid resolution.

The result: Savings of ~6000 hours of efforts and 40% faster resolution times with a resilient, compliant, and intelligent cold chain ready to scale with business growth.
